Cities & towns

Lendingkart is a fintech online platform that lends working capital and business loans to entrepreneurs and startups. Lendingkart was founded in 2014. Instead of focusing on the past financial statements and income tax returns to evaluate the credit risk profile of a potential client, Lendingkart focuses on the client's current year's cash-flows and business growth. The company has more than 640 employees. Though Lendingkart's offices are in Ahmedabad, Bangalore and Mumbai, the fintech firm serves PAN India.

The objective is to make capital funds readily available so that entrepreneurs can focus on the business instead of worrying about gaps in their cash-flows. Lendingkart's main competitors are Capital Float, Faircent, and i-LEND. Lendingkart witnessed 118% increase in its margins before tax from INR 19 cr in FY19 to INR 41.9 cr in FY20. Lendingkart's FY20 revenue stood at INR 464 cr i.e., 113% growth.

Funding amount: 3.8 Cr.(Jan 2021)

Number of funding rounds: 2

Number of investors: 1

You can find their website <https://www.legalwiz.in/>

## 6) PetPooja

Starting out in 2011, in the first avatar, Petpooja was a food delivery platform for Corporates. Think Zomato or Swiggy, but for bulk corporate orders. With this business model, we achieved a respectable mark in 2 years: serving over 200 corporates by partnering with 300+ restaurants.

But, in the process, we realized that because of the lack of appropriate technology, there were tremendous operational inefficiencies and the restaurant processes were not scalable. A close look at these restaurants' daily struggles led us to make Petpooja in its current avatar- a coherent Restaurant Management software.

Details of the startup:

Started in: 2011

Founders: Apurv Patel, Parthiv Patel

Industries: Food and Beverage, Hospitality

Number of employees: 11-50

Funding amount: \$4,363,951

Number of funding rounds: 2

Number of investors: 2

You can find their website <https://www.petpooja.com/>

Enterprises and industries benefit from Invixium's completely integrated hardware and software solution, which delivers relevant insights for enhanced safety, health, security, and productivity. The executive team at Invixium has over 200 years of expertise in the biometric access control sector.

Details of the startup:

Started in: 2012

Founders: Shiraz Kapadia

Industries: Information Technology, Biometrics

You can find their website <https://www.invixium.com/>

## 8) MYBYK

MYBYK is the largest and first premium bicycle sharing and rental service in India. Their goal is to promote the use of bicycles as an alternative and sustainable form of transportation by removing the bother of repairs and maintenance for the end-user, as well as making bicycles more accessible and convenient. In less than 5 years since its foundation, they had grown to a fleet of 4000 bicycles spread throughout four cities: Ahmedabad, Mumbai, Udaipur, and Jamnagar.

Details of the startup:

Started in: 2014

Founders: Arjit Soni

Industries: Apps, Cycling, Rental

Number of employees: 1-10

Funding amount: \$1,000,000

Number of funding rounds: 1

Number of investors: 2

You can find their website <https://mybyk.in/>

## 9) Ecolibrium Energy

Ecolibrium is a pioneer in India when it comes to smart grid and energy management technology. Ecolibrium Energy is trying to transform the way the world uses energy. They work with businesses, institutions, and industries to help them use energy more wisely, spend less on it, and produce cash flow that improves their bottom line. Their technology-enabled solutions assist utilities/grid operators in meeting the demands of those who distribute energy and are responsible for maintaining a real-time supply-demand balance.

Details of the startup:

Started in: 2009

Founders: Chintan Soni, Harit Soni

Industries: Energy, Industrial Automation

Number of employees: 1-10

Funding amount: \$2.6 million

Number of funding rounds: 2

Number of investors: 1

You can find their website <https://www.ecolibrium.io/>

## 10) Tarrakki

Tarrakki is an Android and iOS money management software that allows users to make regular, calculated investments in mutual funds and stocks. Investment can be customized depending on customers' personal life objectives, income, age group, and risk appetite. The app allows users to keep track of all of their assets and offers advice on how to improve individual portfolios. Tarrakki is easy to use, even for individuals who have never invested before.

Details of the startup:

Started in: 2018
